## 1. RELEASE NOTES

The new software version **Jaltest 18.3** once again offers more improvements and innovations that consolidate this tool as a benchmark in multibrand diagnosis of commercial, agricultural and OHW (Off-Highway) vehicles.

This version, the following software innovations are particularly noteworthy:

- Jaltest is more intuitive, with shortcuts to the maintenance reset.
- New search functions of models by entering the system name, search of components in a model's diagrams...
- History of the measurements selection of a system. In addition, the display of measurements can also be paused now.
- The results of a System Scan can be stored in a customised brand.
- **And much more...**

Furthermore, we have introduced new brands and models in specific markets, such as KARSAN in buses. It is also important to highlight the connection through **ISOBUS** in agricultural vehicles and systems of implements. Last, but not least, Jaltest Soft 18.3 includes more technical information, by adding new guides and procedures, maintenance services, etc.

This version, the coverage is increased with 594 models, 3383 systems, 2581 diagrams and new technical data that includes step-by-step troubleshooting guides, diagnosis help, etc.

- Updating the **FMS Standard** in accordance with the latest revision of the regulation.
- DAF, new VECU body computer system in NEW Euro 6 models.
- Iveco, new Iveco Stralis 2016 models.
- Mercedes-Benz, Setra, specific wiring diagrams for buses in EBS, ECAS, CLCS and ICUC systems.
- Mitsubishi-Fuso, particulate filter regeneration in 4M40/4M50 engines.
- Renault, clutch calibration with disc replacement in V3 models.
- Tata, new models in truck, light commercial vehicles and buses.
- Volvo, calibration of the variable geometry turbine (VGT) in V3 models.
- Trailer, operation data related to brake pads in Wabco EBS E.

- New particulate filter regenerations and injector coding in Volvo V2 and V3 engines.
- New particulate filter regenerations and injector coding in Caterpillar engines.
- New John Deere CE brand with more than 200 models.
- New particulate filter regenerations in Deutz engines.
- New calibrations and parameters for IVT John Deere transmissions.
- New calibrations and parameters in Valtra models.
- **And much more...**

Please, take into account that this document is just a summary of the most relevant information of this new version. For further information, please visit [Jaltest Report](#).

## 2. NEW SOFTWARE FUNCTIONS

### 2.1. JALTEST SOFT

#### 2.1.1. Model filter "Search by system"

A new filter is added in the model selection of a brand. In order to facilitate the model selection, from now on you can filter the model family, search by name, search by category and/or use the new "Search by system" filter.

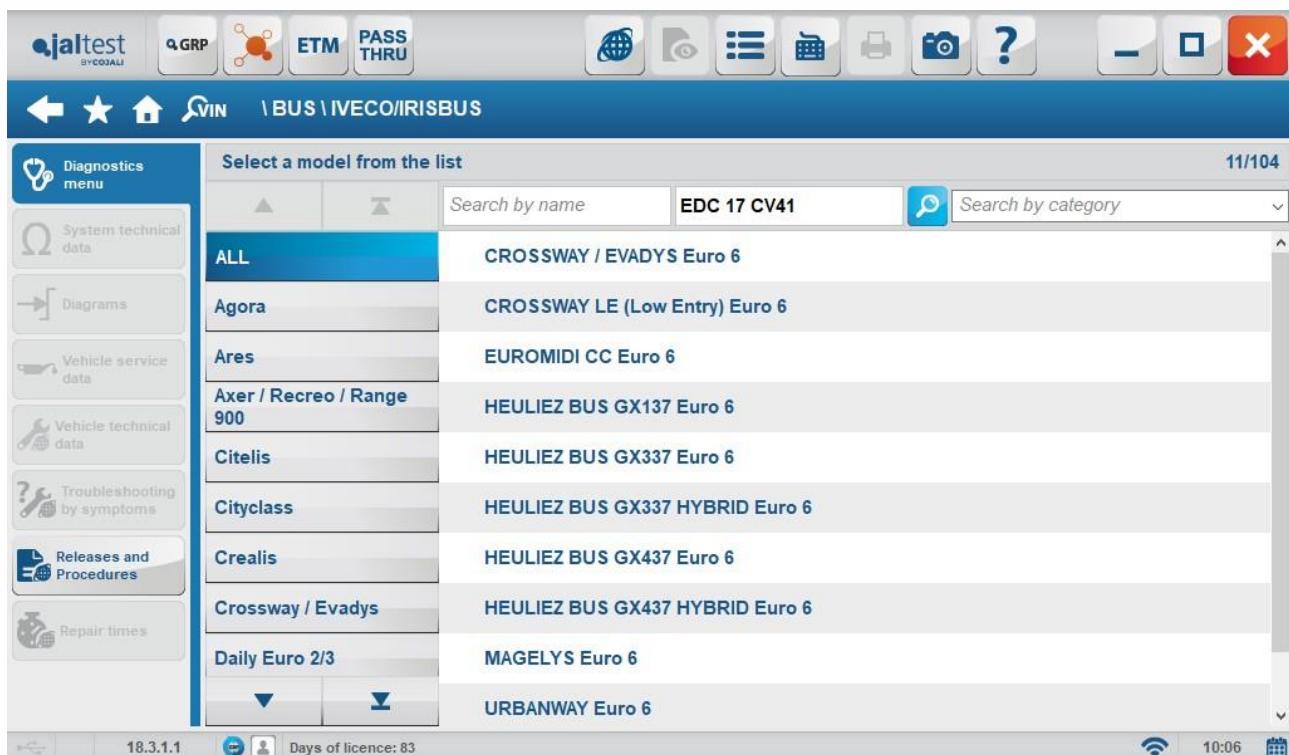

Image 1 Model search with the EDC 17 CV41 system in IVECO/IRISBUS buses

#### 2.1.2. Component search in the model system list

In which system can I find a specific sensor?

Which control unit is the rain sensor in a Volvo FH V4 model connected to? In the front module, in the instrument cluster or maybe in the cab module?

From now on, with Jaltest Soft, you can search a component through the "Component search in the model system list" hyperlink by selecting the model which you want to search in. This option is available in the "Diagrams" main

menu, where you can filter by text and the result of the search returns all the systems with diagram configurations that have a component whose name contains the text of the search.

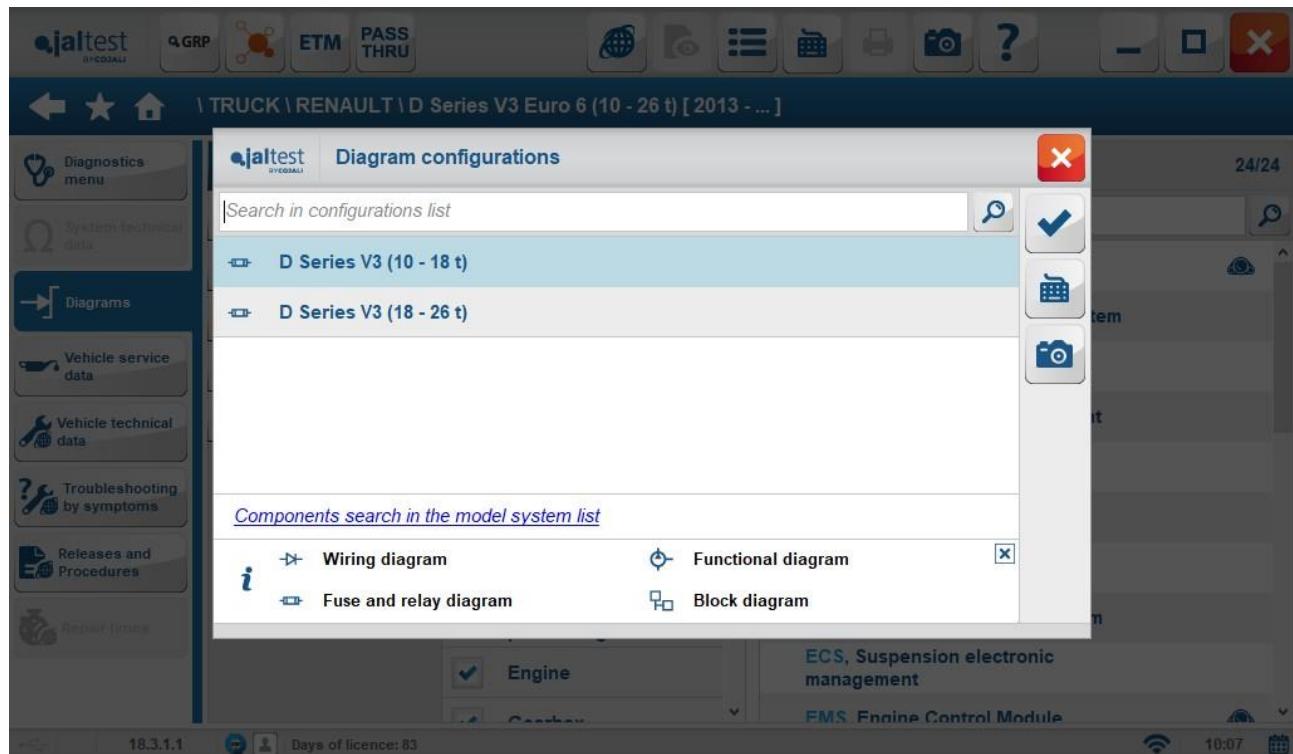

Image 2 Component search in the D Series V3 Euro 6 model in Renault

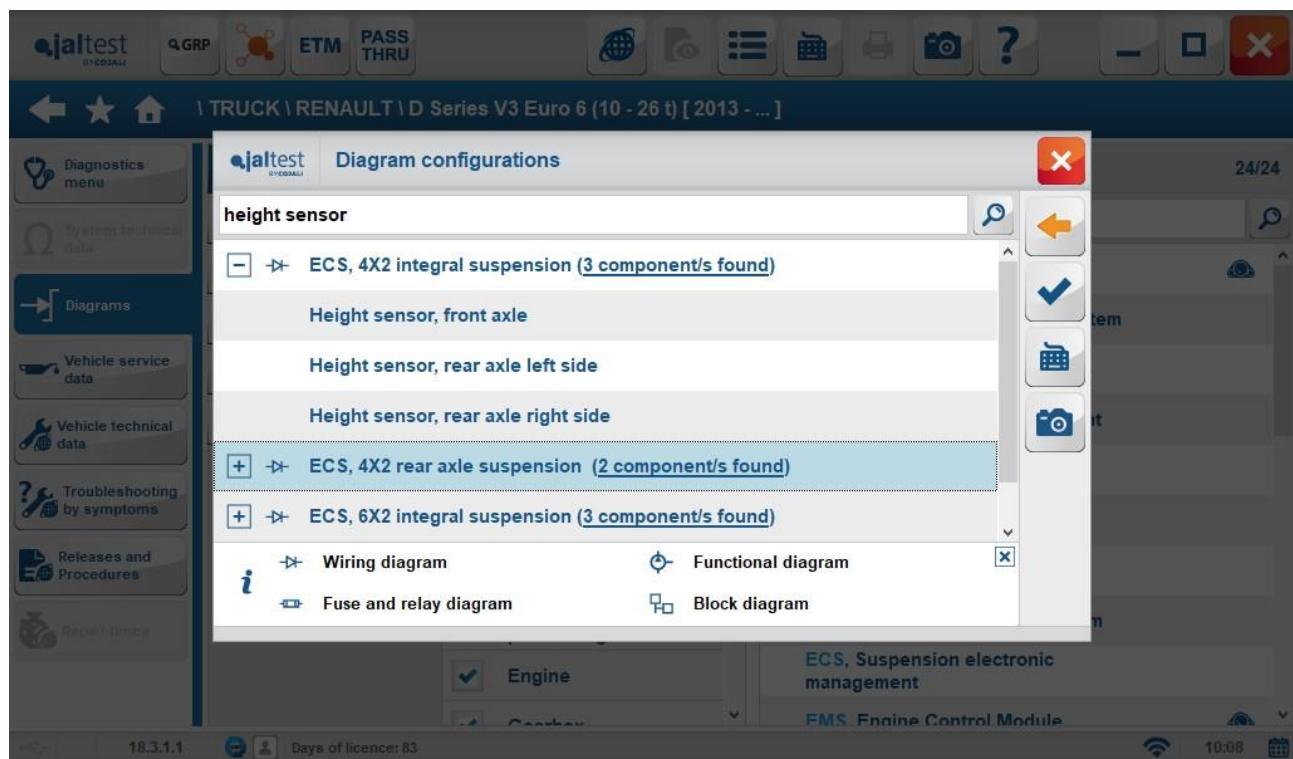

Image 3 Search by text "height sensor" in the diagram configurations

### 2.1.3. "Pause" function in the measurements selection

Image 4 "Pause" function, measurements in virtual instruments

### 2.1.4. Maintenance reset shortcuts

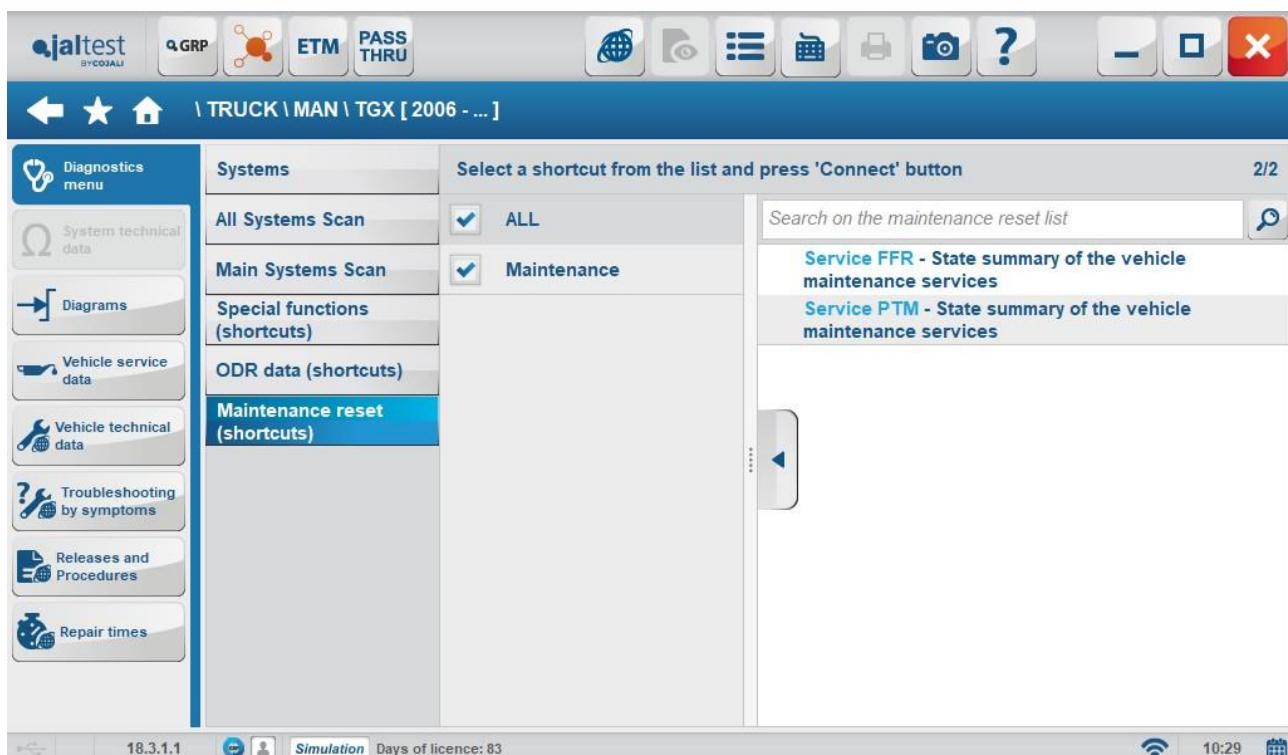

Image 5 Maintenance reset shortcuts in MAN TGX

### 2.1.5. Customised brands

Now, you can save the system scan results of a model in a customised brand.

The screenshot shows the Jaltest software interface. At the top, there's a toolbar with icons for GRP, ETM, PASS THRU, and various utility functions. Below the toolbar is a navigation bar with back, forward, and home buttons, followed by the text 'TRUCK \ ISUZU \ F Series Euro 6, engine: 4HK1-TC'. On the left, a sidebar contains links for Diagnostics menu, System technical data, Diagrams, Vehicle service data, Vehicle technical data, Troubleshooting by symptoms, Releases and Procedures, and Repair times. The main panel has a header 'Systems' and 'System scan completed.' with 'Detected systems: 8'. It lists the following systems with their ECUs and error counts:

System	ECU	Count
AdBlue/DEF, Exhaust gas treatment system	DATA	x2
Immobilizer	DATA	x2
ABS/ASR Hydraulic, Anti-lock hydraulic braking system	DATA	x3
ISS/HSA, Hill start assist system	DATA	x1
Mimamori, Electronic Module	DATA	x2
4HK1-TC, Electronic Diesel Control, Common Rail	DATA	x2
Smoother, Transmission Electronic Control Unit	DATA	x2
SRS, Supplemental Restraint System	DATA	x2

At the bottom of the main panel, there are buttons for 'WITH PRESENT ERRORS' and 'WITHOUT PRESENT ERRORS'.

At the very bottom of the screen, there are status indicators for battery, signal strength, and time (10:58), along with a date field 'Days of licence: 297'.

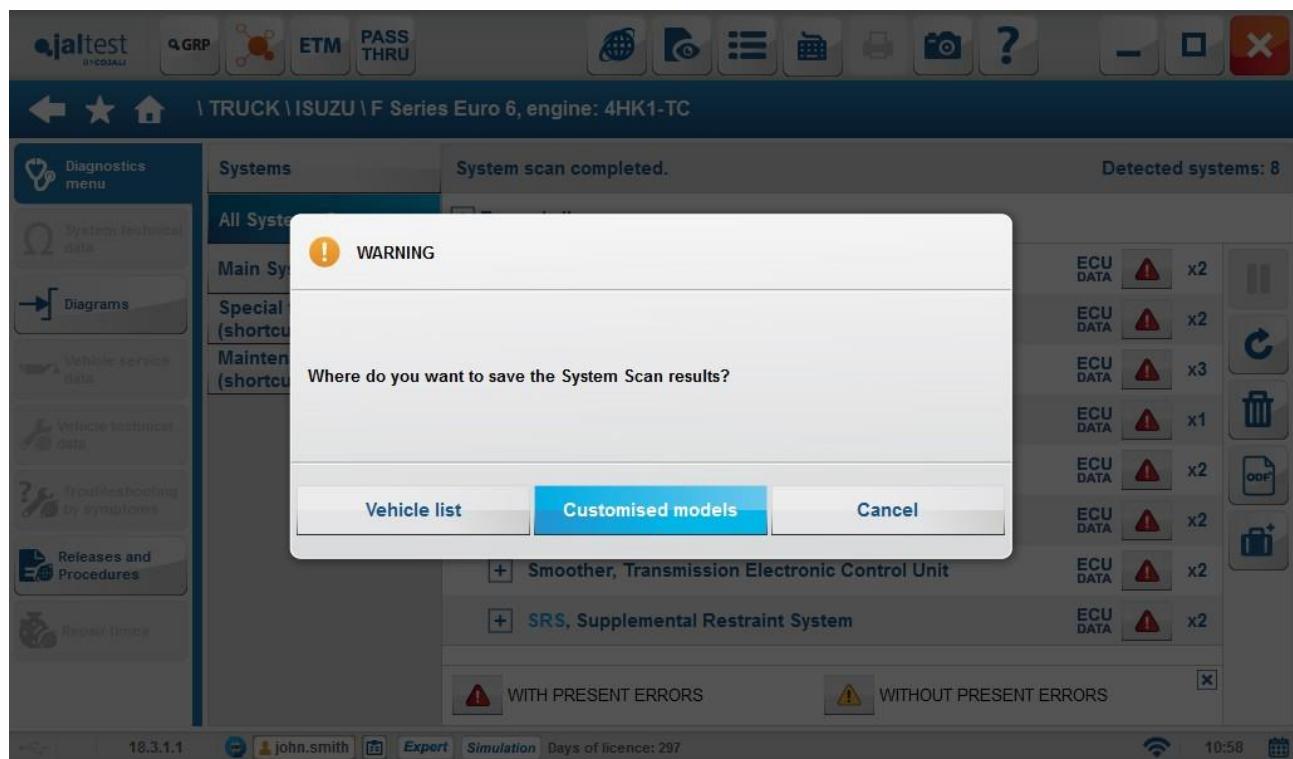

Image 7 Save the system scan results in customised models

### 3. NEW DIAGNOSIS FUNCTIONS AND SYSTEMS

---

Please, take into account that this document is just a summary of the most relevant information of this new version. For further information, please visit [Jaltest Report](#).

#### 3.1. DAF

In the XF and CF Euro 6 (New F7/BH Series) models:

- **New VECU** (Vehicle Electronic Control Unit) **system**.
- **PCI** (Paccar Control rail Injection) Engine control system.
  - o System operation data and reset.

#### 3.2. Iveco

- **New models** [2016 - ...]:
  - o Stralis XP / Hi-Way / Hi-Road/ Hi-Street Euro6
  - o Stralis X-Way Euro 6
  - o Stralis NP CNG/LNG Euro 6

It includes information of the electronic architecture of communication bus.

- **New VCM Step 2** (Vehicle Control Module) **system**.

#### 3.3. MAN

- Improvement in the control of specific references in Euro 6 models of the most systems such as EDC 17, PTM, ZBRII, INS, BHTC, Tipmatic 12+2 Scania, etc.

#### 3.4. Mercedes-Benz

The following innovations are included in vehicles with MB4 technology:

- Improvement in the control of specific references in the drivetrain systems such as MCM, ACM, CPC and TCM.

Also available for MERCEDES-BENZ buses and other body works with MB chassis.

- **VRDU** (Video Radar Decision Unit), deletion of the memory of the errors stored permanently.

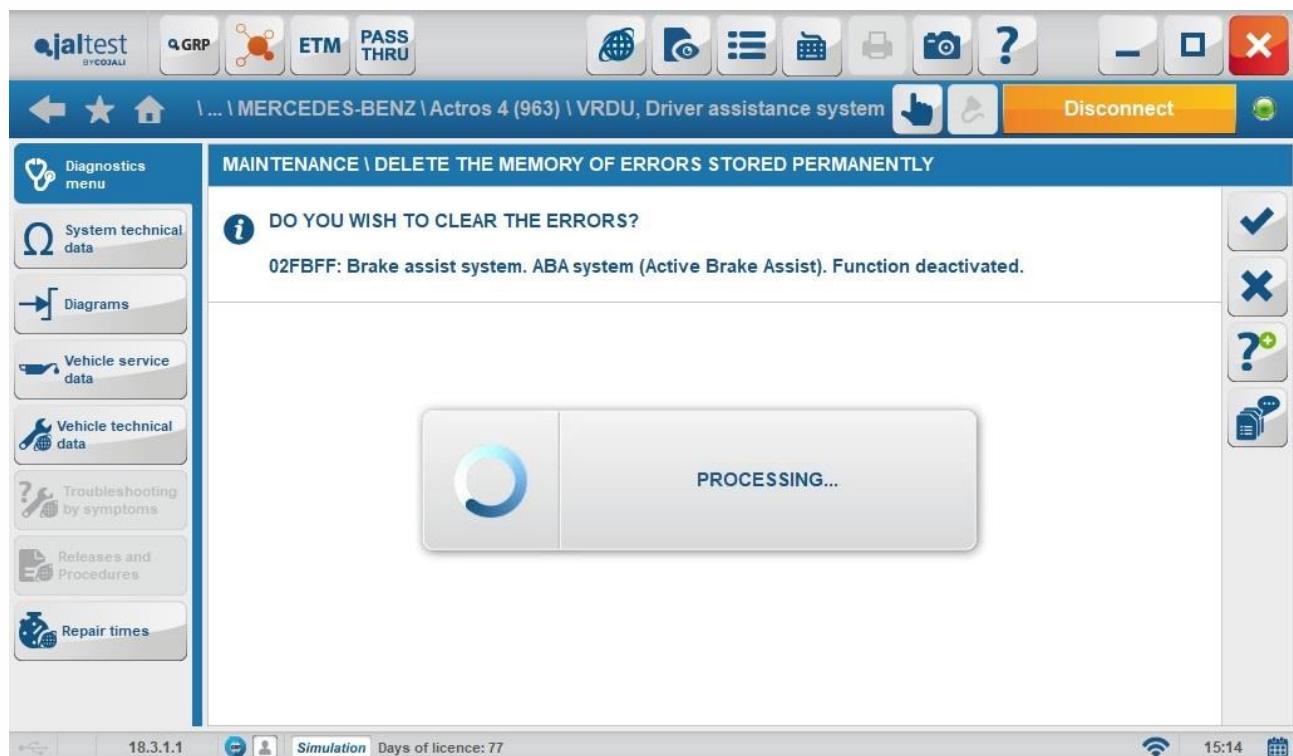

Image 8 O2FBFF Error deletion in the VRDU system

### 3.5. Renault

- TECU (Transmission Electronic Control Unit) in vehicles with V3 technology, clutch calibration with disc replacement.
- ECM ZD DTi 3 (Electronic Control Module) in D Series models, DPF (Diesel Particulate Filter) and system reset after the filter replacement.

Note: It also advisable to carry out the new "NH<sub>3</sub> concentration reset in the SCR" function in the ADCM system after performing the DPF (Diesel Particulate Filter).

### 3.6. Scania

In the new R, G, P and S Series Euro 6 models.

- APS2 (Air Process System), actuators of the dump and regeneration solenoid valves, pressure sensors check.

### 3.7. Volvo

- EMS (Engine Management system) in vehicles with V3 and V4 technologies, engine oil pressure check (EEV Standard) and calibration of the VGT (Variable Geometry Turbine).

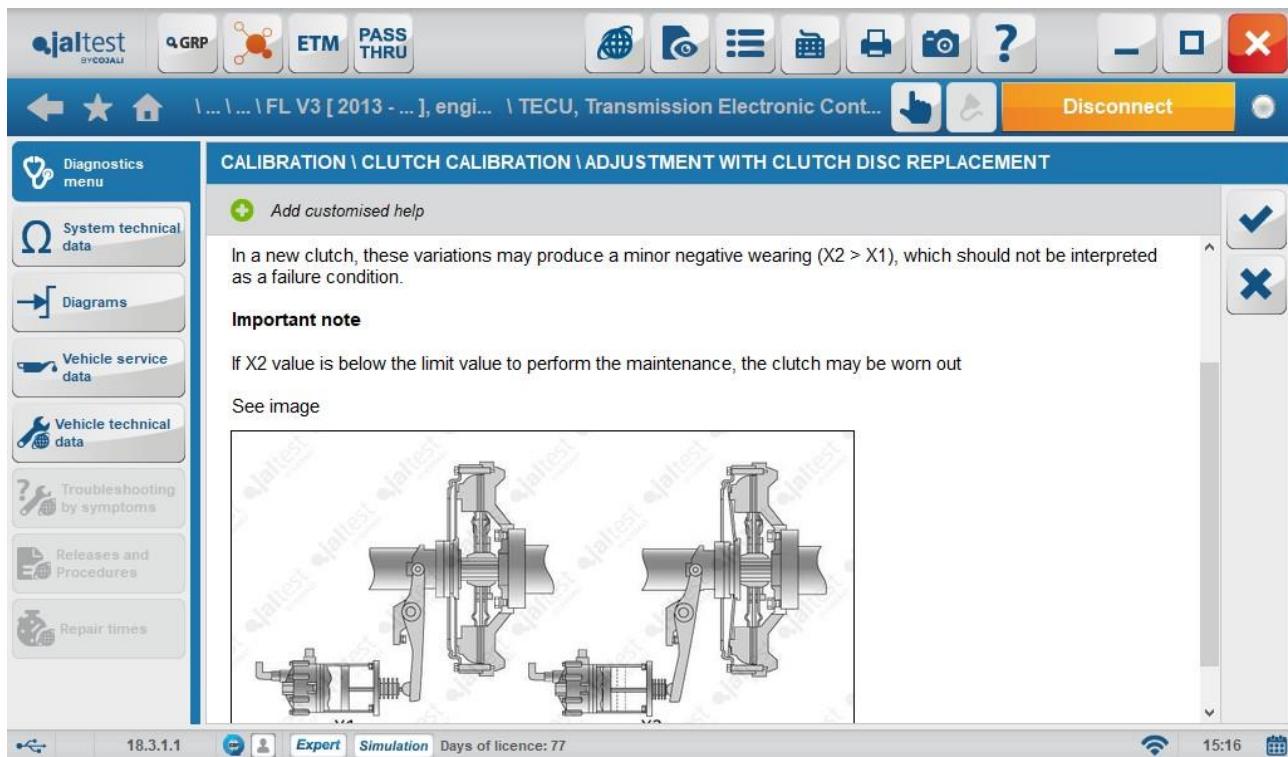

Image 9 Clutch calibration with disc replacement in the FL V3 model

- FLS (Forward Looking Sensor) in vehicles with V4 technology, distance sensor Also available in VOLVO buses and other body works with VOLVO chassis.
- In Volvo hybrid buses, new HPCU (Hybrid Powertrain Control Unit) system.

### 3.8. Trailer

Jaltest keeps improving its coverage in Trailer systems, including the new references of Trailer EBS modules, and it remains the leader in the diagnosis of this type of vehicles.

#### 3.8.1. Knorr-Bremse

- New controlled diagnosis codes in the TEBS Gen 2 system:

#### 3.8.2. Wabco

- EBS E trailer, brake pads wearing data and extension of other histograms in ODR (Operating Data Recorder).

	RECORD 1	RECORD 2	RECORD 3	RECORD 4
STATE	NO OK	OK	NO OK	OK
OPERATION TIME	174:33	187:34	204:29	213:02
DISTANCE TRAVELED	19	29	49	69
SERVICE LIFE	19	---	20	---
REMAINING SERVICE LIFE	---	10	---	20

Image 10 Information about the brake pads wearing in the EBS E system

### 3.9. LCV

#### 3.9.1. IVECO

- New RRM (Radio Receiver Module) system of Bosch.

Image 11 RPM Audio system image in the IVECO Daily

#### 3.9.2. Fiat

- EDC 8F3 CFS V2 CAN (Electronic Diesel Control), extension of measurements and fuel pressure control valve reset in the injection rail.

#### 3.9.3. Ford

- New SID211 system in Ford Transit models.

#### 3.9.4. Mercedes Benz

- New systems in the models of the Vito [447] family:
- CDI6 system in OM642 engines, improvement in the control of references.
- CDID3 system in OM651 engines, new resets and maintenances are included.

### 3.9.5. Piaggio

- DPF (Diesel particulate filter) reset in the EDC 17 CO8 system in the Porter model.

### 3.9.6. Renault

- Nuevo HEPS (Hydraulic Electrical Power Steering) system.

### 3.9.7. PSA Group

- EDC 17 CP52 KWP2000 (Electronic Diesel Control), injector coding, turbocompressor calibration, fuel tank drain, new resets and maintenances, such as the reset after the Lambda sensor replacement or DPF (Diesel Particulate Filter) replacement.

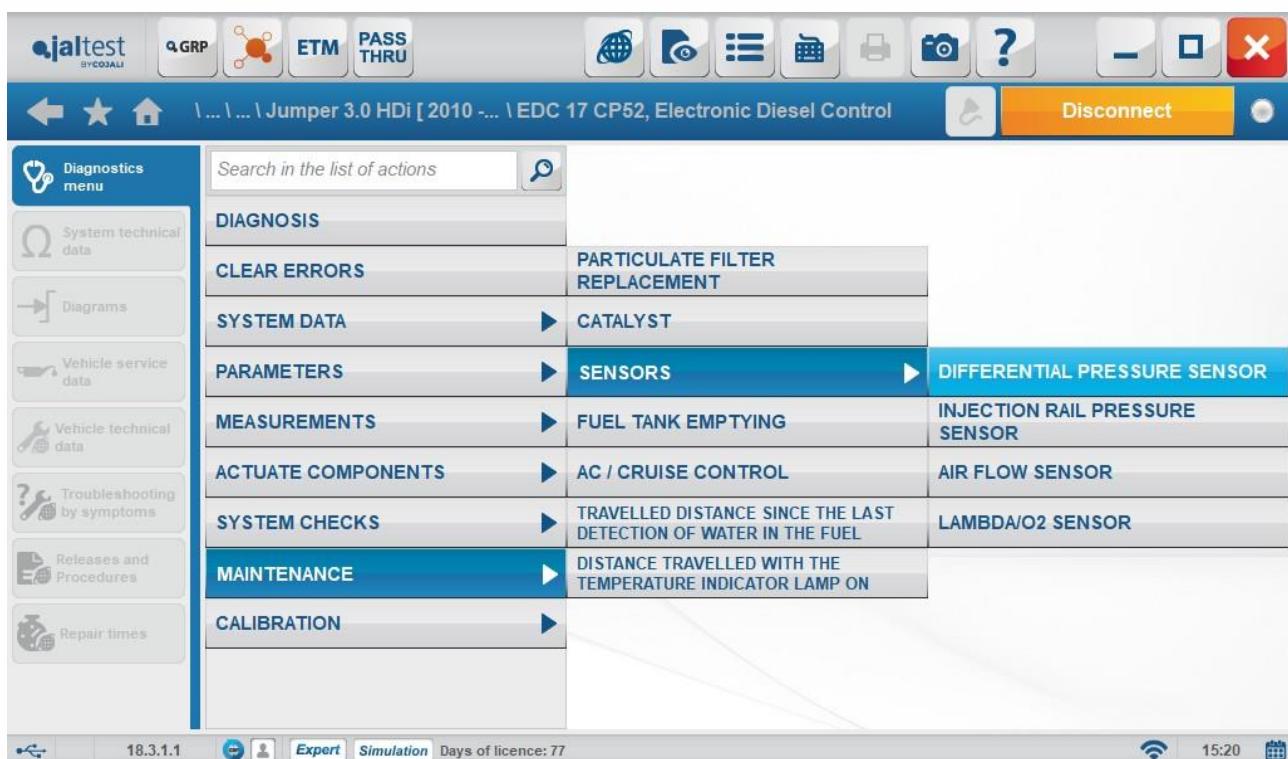

Image 12 MAINTENANCE menu in the EDC 17 CP52 system

### 3.10. Manufacturers

- Jaltest integrates influential innovations in all markets through the MANUFACTURERS routes. It is noteworthy the innovations listed below in Cummins and Allison, but 18.3 version also increases its coverage in brands such as BENDIX, CATERPILLAR, DETROIT DIESEL or NAVISTAR among others. We recommend you check the innovations of the Jaltest Soft US project.

### 3.11. Other brands

- Please, take into account that this document is just a summary of the most relevant information of this new version. For further information, please visit **Jaltest Report**.

#### 3.11.1. Agrale

- Speed limit modification in MWM systems of Agrale vehicles, EDC 7 C1 Euro 3 o Maxxforce 7.2/4.8 Euro 5.

#### 3.11.2. Ashok Leyland

- New EDC 17 CV54 (Electronic Diesel Control) and EDC 16 **systems**.

### 3.11.3. CAMC

- New EDC 17 CV44 (Electronic Diesel Control) /CV54 Hanma system.

### 3.11.4. Dongfeng

- New actuators of the AdBlue/DEF ACU (Aftertreatment Control Unit).

### 3.11.5. Ford Otosan

- Improvement in the control of references in the EDC 7 EcoTorg Euro 5 system and maintenance control lamp reset and engine oil change.

### 3.11.6. Hino

- Engine control system J05D, operation data and new activations.
- Improvement in the control of references in P11C, J05D/E, S05C, J07E and A09C engines.

### 3.11.7. Isuzu

- New systems of the brand.
  - o ISS (Idle Start Stop)
  - o HSA (Hill Start Assist)
- Engine control system RZ4E-TC, system settings and configurations.

### 3.11.8. Mitsubishi Fuso

- New MCM 6R10 system and ISS (Idle Start Stop) system.

- EDC 7 C4-6.6 (Electronic Diesel Control), DPF regeneration in MR engines.
- 4M4 and 4M50

The screenshot shows the jaltest software interface. The top navigation bar includes icons for GRP, ETM, PASS THRU, and various system status indicators. The main title bar displays the path: 'Cantér, engine: 4M50 | EDC 4M50 (CAN), Electronic Diesel Control, C...' and a 'Disconnect' button. On the left, a vertical sidebar contains links to Diagnostics menu, System technical data, Diagrams, Vehicle service data, Vehicle technical data, Troubleshooting by symptoms, Releases and Procedures, and Repair times. The central panel is titled 'MAINTENANCE \ PARTICULATE FILTER REGENERATION'. It contains a note: 'BEFORE CONTINUING, PLEASE READ CAREFULLY THE INITIAL CONDITIONS AND THE HELP PROVIDED.' followed by a list: '- ACTIVATE PARKING BRAKE', '- GEAR SHIFT IN NEUTRAL POINT', and '- FOR A CORRECT PERFORMANCE OF THE TEST, THE ENGINE MUST BE STARTED AT IDLE AT SERVICE TEMPERATURE'. Below this, a note states: 'IT WILL TAKE APPROXIMATELY 40 MINUTES CAUTION! DURING THE PROCESS, THE EXHAUST GASES REACH HIGH TEMPERATURES. KEEP THE GASES OUTLET CLEAR AND TAKE ALL THE APPROPRIATE SAFETY MEASURES THE PROCESS CAN BE CANCELLED AT ANY TIME IF SO DESIRED BY THE USER'. A table lists initial conditions: ENGINE RPM (1023 rpm, green checkmark), NEUTRAL POSITION SWITCH (OFF, red X), PARKING BRAKE SWITCH (OFF, red X), and COOLANT LIQUID TEMPERATURE (69 °C, green checkmark). To the right of the table is a vertical column of four buttons: a checkmark, a red X, a question mark, and a speech bubble. The bottom of the screen shows the software version '18.3.1.1', user information, and system status icons.

Parameter	Value	Status
ENGINE RPM	1023 rpm	Green Checkmark
NEUTRAL POSITION SWITCH	OFF	Red X
PARKING BRAKE SWITCH	OFF	Red X
COOLANT LIQUID TEMPERATURE	69 °C	Green Checkmark

Image 13 Initial conditions of the particulate filter regeneration

## 4. TECHNICAL INFORMATION

This section lists some of the most important innovations in terms of technical information.

### 4.1. DAF

- Technical data of the vehicle in XF and CF Euro 6 models (New F7/BH Series) with MX11 and MX13 engine types. Procedures such as the AdBlue/DEF EAS-4 module filter change are included. The version also has maintenance services for all DAF Euro 6 models.
- System Display of the fuel circuit of the ECS-DC6 (Engine Control System) in LF Euro 6 models.

### 4.2. MAN

- Diagram of CAN communication network in the TGX Euro 6 vehicle.

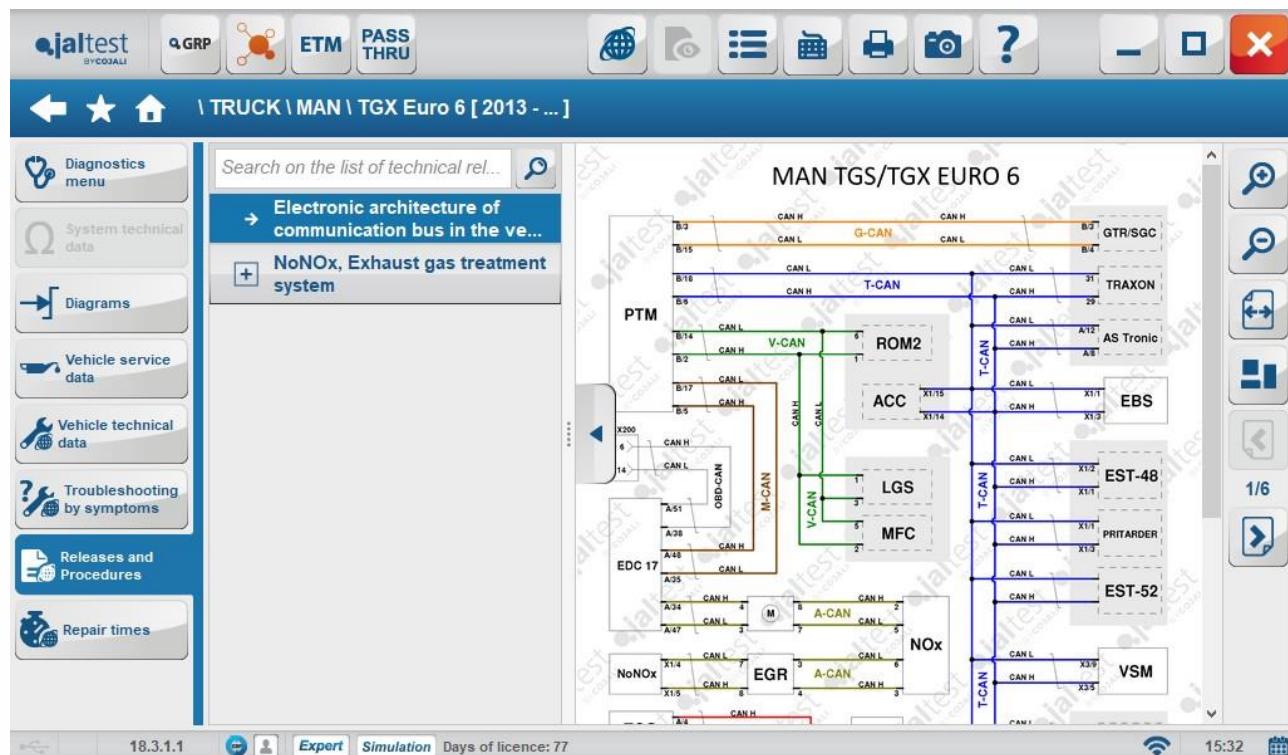

Image 14 CAN Architecture in MAN TGS and TGX Euro 6

#### 4.3. Mercedes-Benz/Setra

- System Display of the ESP 9 CEI system in Sprinter.
- Procedure of the maintenance rest in the Vito [447] model.

Image 15 System Display of the ESP 9 system in Sprinter

#### 4.4. Renault

- Fault Code Troubleshooting in the ECM (Engine Control Module), ACM (Aftertreatment Control module) and TECU (Transmission Electronic Control Unit) systems in models with V3 technology.

#### 4.5. Volvo

- Manual diagnosis in Volvo Euro 6 buses with V3 technology.

#### 4.6. Wabco

- Wiring diagram configurations in buses for Wabco EBS Gen3 systems and the advanced emergency braking system OnGuard Plus.

#### 4.7. Other brands

- Fault Code Troubleshooting in **Isuzu** systems and new wiring diagrams configurations, for example in the Aisin 465 transmission or in the ABS/ASR systems.
- Fault Code Troubleshooting in engine control systems in **Hino JOSE, JO8E...**
- Calibration or learning process of the change values in the Duonic transmission in **Mitsubishi Fuso**.

## 5. RELEVANT INFORMATION: NEW BRANDS, MODELS AND CABLES

In this section, we have taken into account global information of the Jaltest project, for all the markets and vehicle types.

### 5.1. Brands

The new brands in this version are:

- ASHOK LEYLAND, TATA, KARSAN and BLK in buses.
- CHEREAU and PSI in the manufacturers route.
- MULTICAR, HYDREMA and WAKER NEUSON in OHW vehicles and Construction equipment.

ISOBUS accesses have been created in agricultural vehicle.

### 5.2. Models

The most relevant models in this version are:

- Fiat Ducato 115 Multijet (2016 - ...) model
- Ford Transit 2.0 (2016 - ...) model
- Isuzu Turquoise Euro 6 bus model with 4HK1 engine.
- Old Neoplan bus models.
- Otokar Ulyso T Euro 6 bus model.
- Higer KLQ6932 / HGS9 bus model.
- Iveco Stralis Euro 6 [2016 - ...] models.
- Mitsubishi Fuso Super Great model with 6R10 engine.
- UD Trucks Condor model with GH7 engine.
- Models in TATA trucks and light commercial vehicles
