

2013 Release 1 News

CARS

New models

Volvo V40 (-12), Volkswagen Up, Seat Mii and Skoda Citigo are new models added in 2013 release 1. Another news in models are two electrical vehicle from Renault. The all new Twizy and the Kangoo ZE covers basic functions in most systems.

New functionality

Land Rover and Jaguar has been updated with new functionality across the model range.

Many additions...

The 2013 Release 1 offers a large number of new diagnostic functionality. More than 1100 systems in over 300 models has been updated with basic functions like fault code reading and erasing. Also more enhanced functionality like programmings and parameter settings are implemented.

GENERIC OBD

There has been an addition in the advanced mode with the functionality to read the IUPR (In-Use Performance Ratio) parameter in Diesel engines.

New types in the Vehicle selection

There is an addition of three new system types in the vehicle selection in the software. There has been a restructure of system types to easier find the system you are searching for. Suspension, Heating/Cooling and Electrical Vehicle has from now on separate system types.

Firmware

The firmware which is loaded in the VCI is from this release splitted into smaller sections to enable faster update of the VCI.

GUIDE

Brand		Engine	Brake	Instrument	AC	Gearbox	Immobiliser	Restraints	Multifunction	Service
Model	2004-2007	●	●	●	●			●	●	●
Adjustments	2004-2006	●	●							
Programmings and tests	2006-2007								●	

Brand and Models are listed as in the CARS and TRUCKS software.

Year range in model includes a complete range for all systems with new or updated functionality.

The OBD functions e.g. Adjustments and programmings that are listed are new or updated for the marked system.

Systems with markers are new or updated with read/erase fault codes, real time data and/or activations.
