

# 2013 Release 1 News

## TRUCKS

### New structure

In 2013 Release 1 there has been an addition in the vehicle selection. You can now select Generic Truck to access common systems sorted by manufacturer of the system rather than sorted by brand of vehicle.

### New brand

Diagnostics for KAMAZ trucks has been added. This covers Engine, Brakes and Suspension systems. There are new additional cables to access these systems.

### New cables

A total of 5 new cables will be available from 2013 Release 1. 4 of those are for Wabco and Knorr systems in Generic Truck and Kamaz. The final new cable is for Generic Bus, gearbox and door systems.

### Trailer

The ECU-exchange function for Wabco TEBS is added in the database. This function read the parameters in the existing ECU and configure the new ECU the same.

### New types in the Vehicle selection

There is an addition of three new system types in the vehicle selection in the software. There has been a restructure of system types to easier find the system you are searching for. Suspension, Heating/Cooling and Electrical Vehicle has from now on separate system types.

### Firmware

The firmware which is loaded in the VCI is from this release splitted into smaller sections to enable faster update of the VCI.

## GUIDE

| Brand                  |           | Engine | Brake | Instrument | AC | Gearbox | Immobiliser | Restraints | Multifunction | Service |
|------------------------|-----------|--------|-------|------------|----|---------|-------------|------------|---------------|---------|
| Model                  | 2004-2007 | ●      | ●     | ●          | ●  |         |             | ●          | ●             | ●       |
| Adjustments            | 2004-2006 | ●      | ●     |            |    |         |             |            |               |         |
| Programmings and tests | 2006-2007 |        |       |            |    |         |             |            | ●             |         |

Brand and Models are listed as in the CARS and TRUCKS software.

Year range in model includes a complete range for all systems with new or updated functionality.

The OBD functions e.g. Adjustments and programmings that are listed are new or updated for the marked system.

Systems with markers are new or updated with read/erase fault codes, real time data and/or activations.
